PRo WIDE STEP

THE NEW LFI WIDE STEP - CERTIFIED TO EN131

The updated K3WD has been certified to the EN131 standard by the test and research centre.

- + **Designed for comfort & safety during longer tasks**
- + **Strong & robust yet lightweight**

As a market-leading UK manufacturer of ladders, steps, and access equipment, LFI work hard to keep their products at the forefront of development and the current standards. After a year of development, LFI are proud to announce that the K3WD PRo Wide Step is now available for sale, fully certified to EN131 (for Professional use) by the Test & Research Centre.

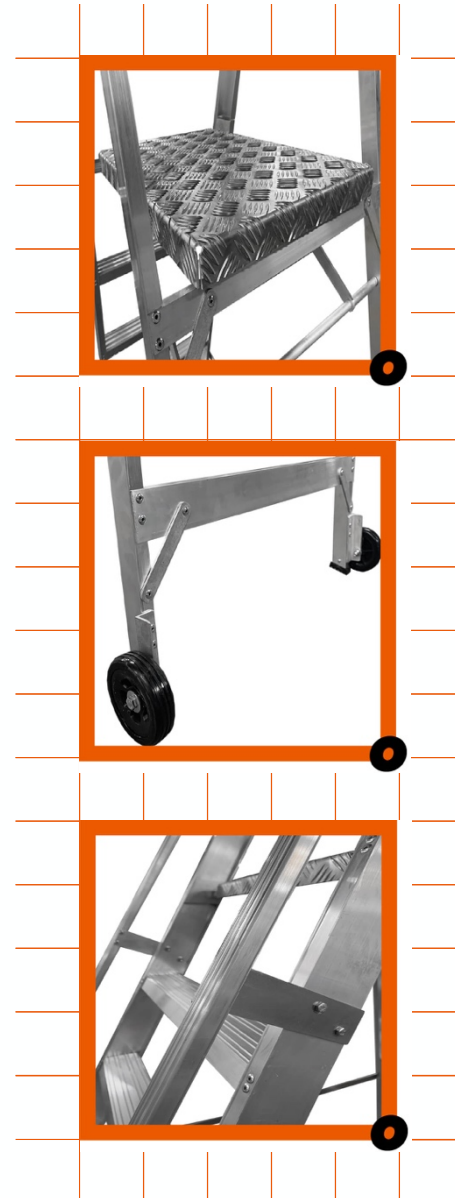

EASY TO USE. A COMFORTABLE PLACE TO WORK

An extra-large platform, handrails and a chained-in workspace allow 360-degree movement whilst remaining in a safe and enclosed working platform. The LFI design has been tuned to optimise the standing area for the user, along with specially shaped handrails to aid a safer climb.

LARGE & STABLE YET EASY TO STORE

Available in 2 to 8 tread, there's a PRo Wide Step for most tasks that would otherwise be completed using a traditional step or podium. And – just like a platform step – it will fold away easily when not in use.
