TuFF ToWER

MAXIMUM SAFETY. MINIMUM FUSS.

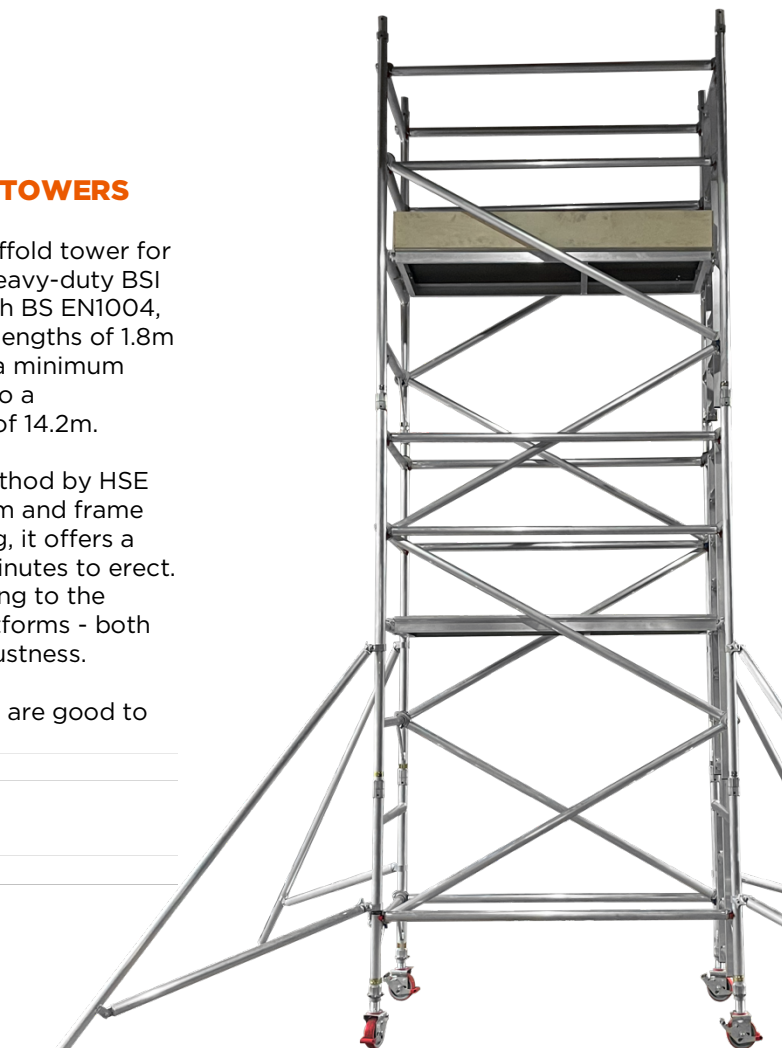

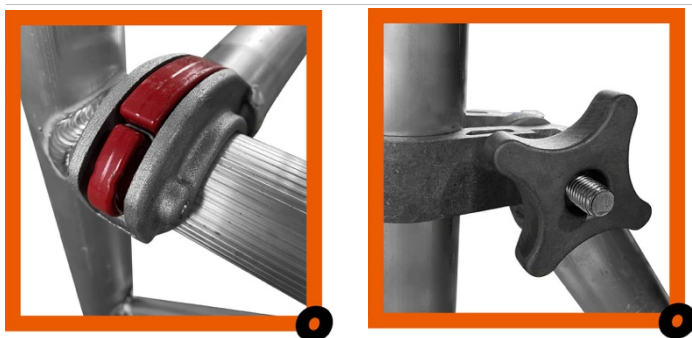

INDUSTRIAL ALUMINIUM MOBILE 3T SCAFFOLD TOWERS

The LFI TuFF Tower is a British manufactured, mobile scaffold tower for professional use indoor or outdoor. Constructed from a heavy-duty BSI Kitemarked 2" 16 gauge aluminium tube that complies with BS EN1004, our industrial scaffolding tower is available in a choice of lengths of 1.8m or 2.5m, single 0.85m or double 1.45m widths, and offers a minimum platform height of 1.2m and a working height of 3.2m up to a maximum platform height of 12.2m and a working height of 14.2m.

The TuFF Tower uses the 3T erection and dismantling method by HSE and PASMA. Designed with a colour-coded bracing system and frame locking clips that are secured to the frame for safekeeping, it offers a simplified assembly process taking an approximated 15 minutes to erect. Heavy-duty dual locking castors, oversized aluminium fixing to the outriggers, one-piece folding toe boards and non-slip platforms - both made from marine plywood give great durability and robustness.

Plus, with a 5 Year Manufacturer's Warranty included, you are good to go in no time at all.
