PRO CONSERVATORY LADDER **MAINTENANCE.** **MADE EASY.**

PROFESSIONAL ALUMINIUM CONSERVATORY LADDER

The PRO Conservatory Ladder is a heavy-duty aluminium conservatory ladder that provides safe and secure access to eave heights between 2.1m and 2.9m - perfect for cleaning, and maintenance of conservatories, orangeries, mobile homes and even caravans.

Manufactured in Britain, the extra wide extending conservatory access ladder features PVC bearer bars that minimise the risk of damaging the contact surface, whilst helping to bridge a conservatory glazing bar and spread the weight evenly. Plus, with pivoting feet, a glazing suction pad with a webbing strap, and an integral roof section handrail to aid climbing between sections, the PRO Conservatory Ladder has been constructed to guarantee maximum safety.

When you're finished using the conservatory access ladder, it simply folds away flat for easy storage or transportation. Plus, the PRO Conservatory Ladder comes with a 10 Year Manufacturer's Warranty. Maintenance. Made Easy.

Need to reach even further? No problem. Extend the conservatory ladder with an additional 0.75m extension section which has its own bearer bar too.
